Data Engineering, Cloud Computing, Artificial Intelligence

PROJECTS

Financialdatapy

- Created a python package that extracts financial data of a company.
- Scraped, and preprocessed financial statements, and historical stock price data of companies in United States, and South Korea specifically.
- Deployed the package to PyPI with a full documentation built with Sphinx.

Capstone Project

- Created a web application that provides users information about stores in Jeju specifically where users can involve in Sustainable Tourism using React.js and Django.
- Scraped list of stores where Jeju local cash voucher can be used and store reviews from Naver Place.
- Extracted keywords of each store reviews by Topic Modeling and stored in PostgreSQL database.

CERTIFICATIONS

AWS Certified Cloud Practitioner
